LEGEND

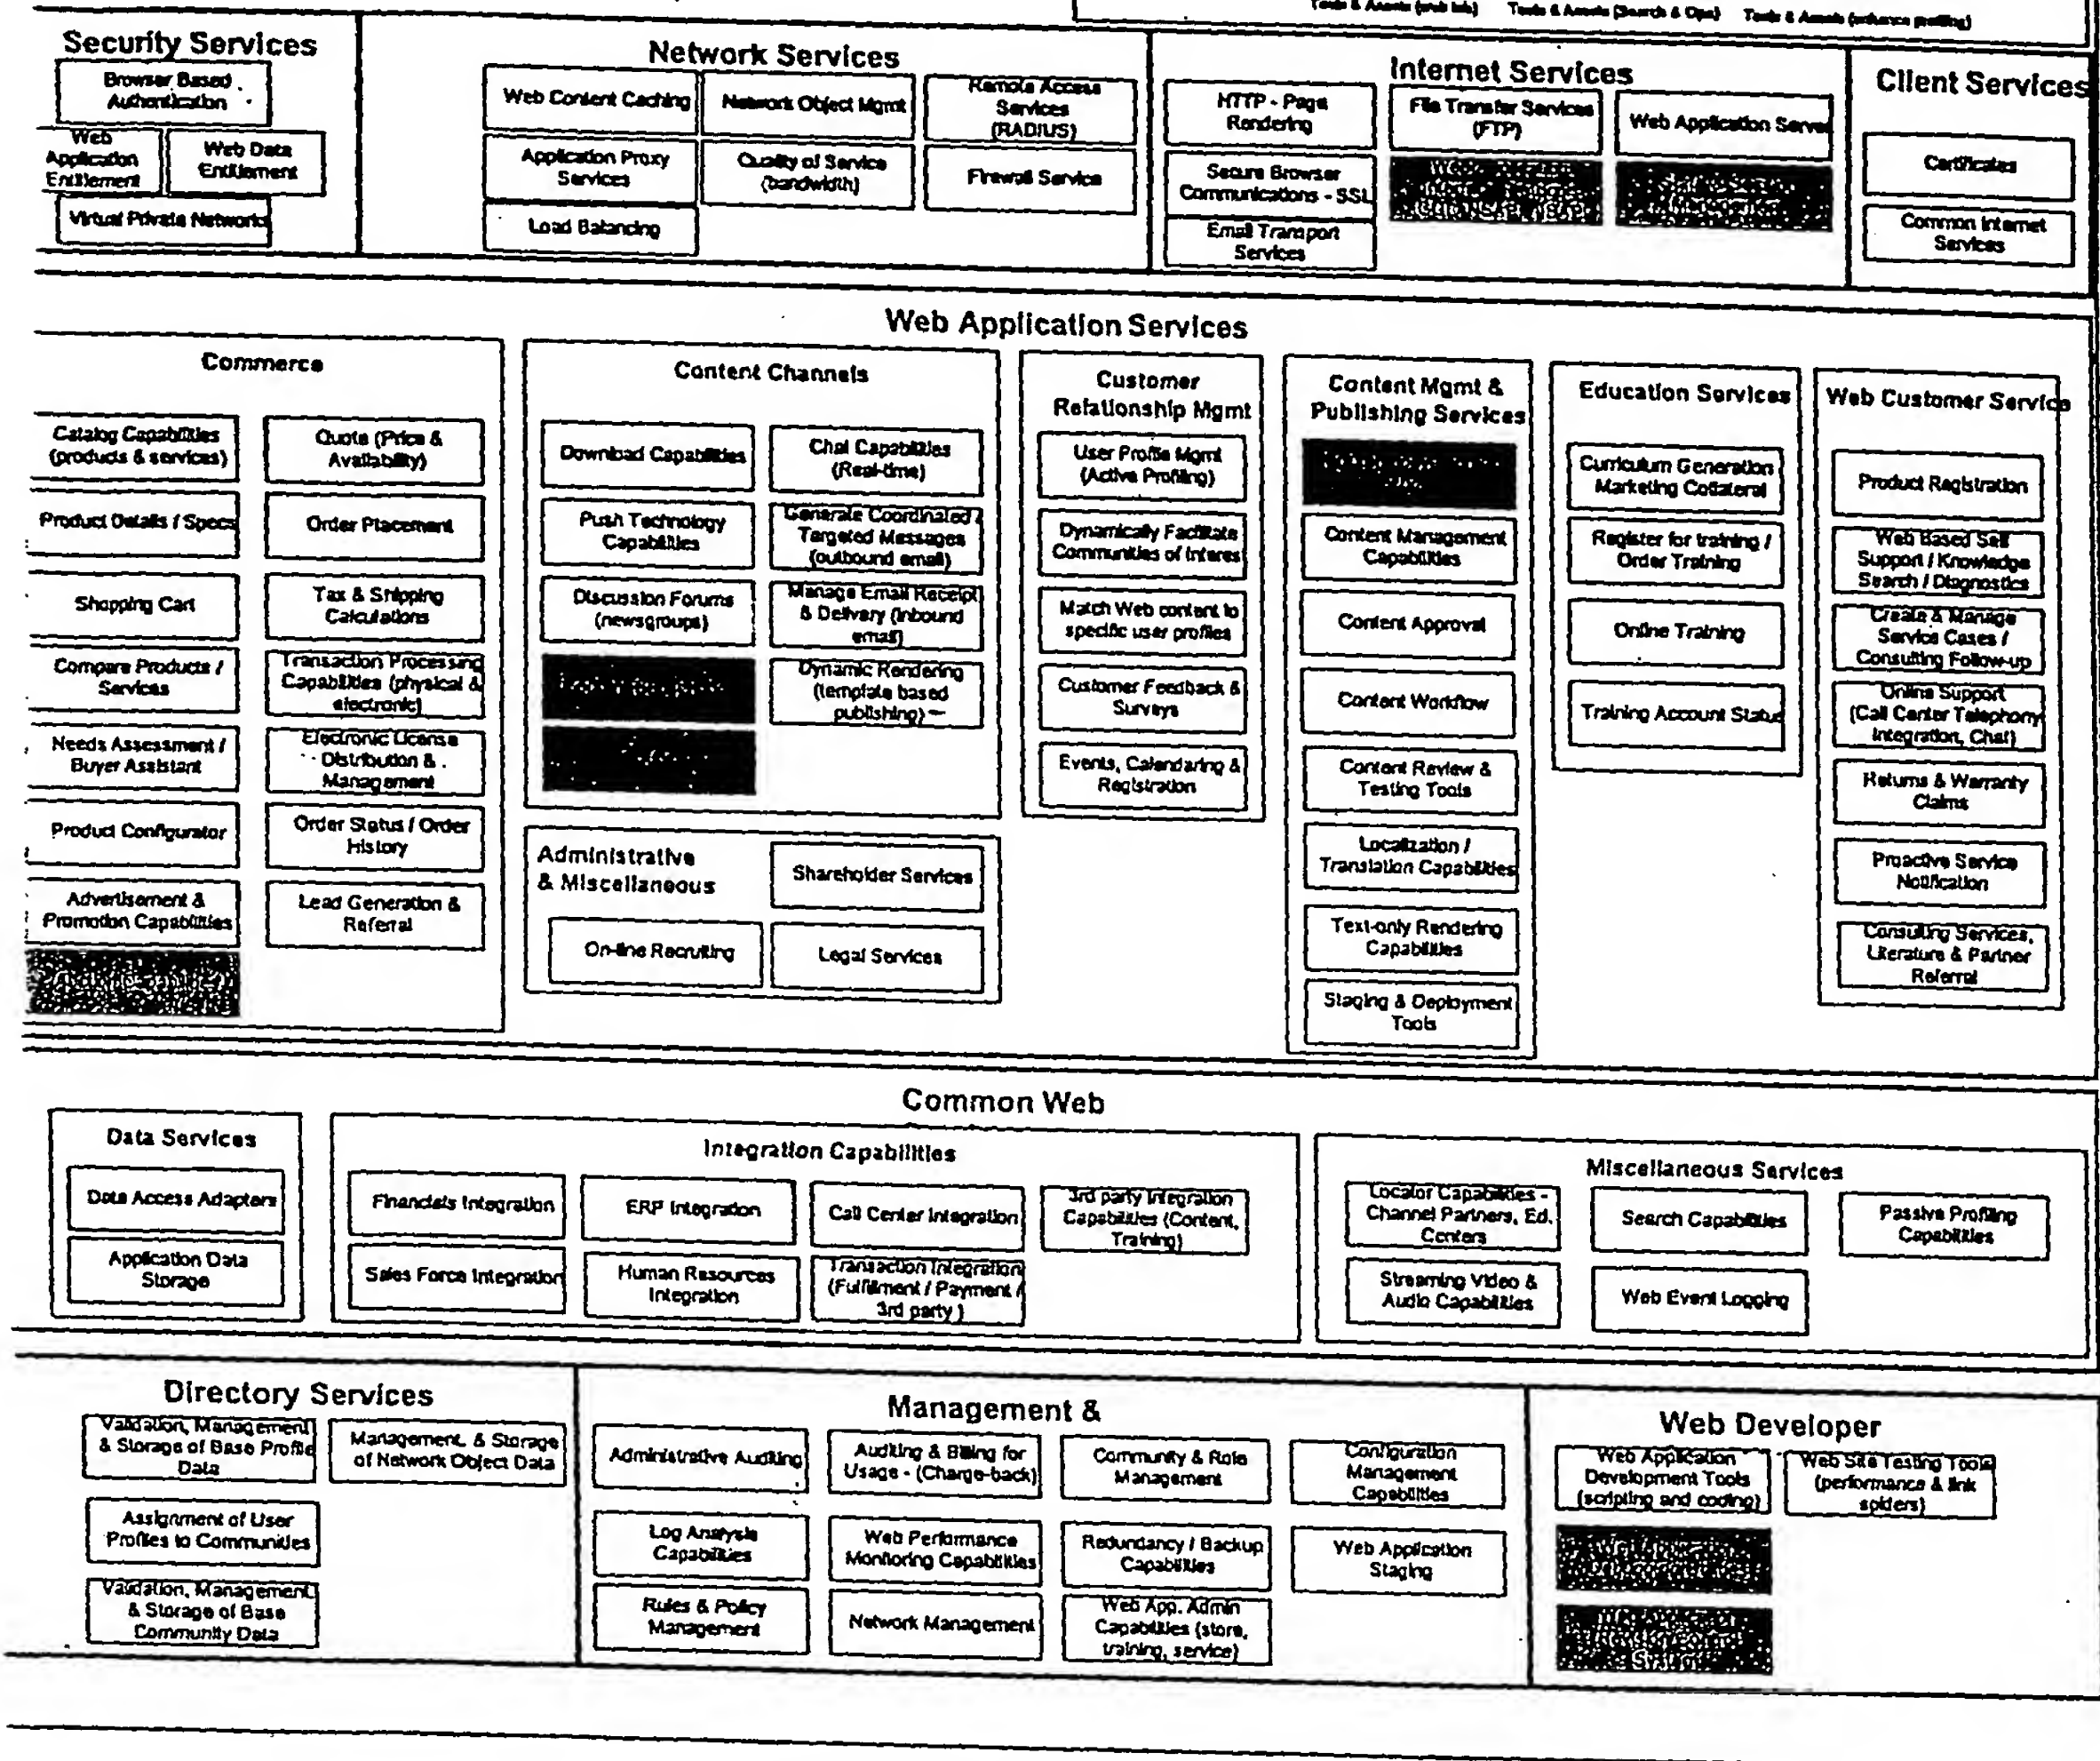

Figure 1P

Core Commerce Capabilities - Infrastructure Services

Legend: ■ Available Today

Core Capabilities

Existing Capabilities

- ☐ Verifies user identity using built-in browser functionality
- ☐ Maintains authentication information throughout sessions
- ☐ Utilizes centralized directory of profiles
- ☐ Provides LDAP compatibility
- ☐ Provides NDS Compatibility

- ☐ Restricts access to specific web applications based upon user privileges
- ☐ Determines if a user or group of users have permission to perform an operation in a specific application
- ☐ Utilizes centralized directory of profiles for entitlement data
- ☐ Provides LDAP compatibility
- ☐ Provides NDS compatibility

- ☐ Restricts access to web content and data based upon user privileges
- ☐ Determines if a user or group of users have permission to manipulate web data (create, read, update, delete)
- ☐ Utilizes centralized directory of profiles for entitlement data
- ☐ Provides LDAP compatibility
- ☐ Provides NDS compatibility

- Stores frequently requested web pages and graphics in a temporary location
- Serves up previously cached content without accessing original source
- Updates cache automatically to ensure integrity of content

- Passes requests from external clients to internal web servers and return results
- Serves as trusted agent to access internal machines on the behalf of clients
- Hides IP Addresses of machines inside a firewall from external clients
- Provides configuration control over external access permissions

- ☐ Spreads tasks among application servers using and intelligent load-balance scheme (CPU utilization)
- ☐ Provides a centralized task distribution mechanism for routing services
- ☐ Identifies servers that are off-line and re-route traffic

- Protects resources on a private network from users of other networks
- Filters network traffic based on security rules
- ☐ Provides alarm notification of attacks
- Provides logging and reporting functions
- Provides port and traffic control

- Serves requested web pages and graphics from web servers to client web browsers
- ☐ Supports page rendering for multiple languages
- Supports multiple content sources (file system, databases, scripts)

Core Capabilities

Existing Capabilities

- Provides encrypted communication with common web browsers
- Supports the Secure Sockets Layer protocol 2.0
- Supports the Secure Sockets Layer protocol 3.0

- Transfers files between computers on the Internet using the standard File Transfer Protocol (FTP)
- Stores files on a file system or database
- Provides mechanism to manage access control for files on a FTP server

- Supports Common Gateway Interface (CGI) protocol
- Supports Netscape API (NSAPI) protocol
- ☐ Supports Microsoft's API (ISAPI) protocol
- ☐ Provides alternative to the interface mechanism that may be used

- ☐ Executes web application logic
- ☐ Utilizes user session information to support interactive applications
- ☐ Provides scalability features
- ☐ Provides fail-over features
- ☐ Provides application programming logic

- Provides mechanism to note and remember one or more preceding events in a given sequence of interactions with the user or application
- ☐ Tracks state and session information
- ☐ Manages multiple independent sessions simultaneously active
- Supports Client Cookies
- ☐ Supports Client URL Encoding
- Supports Server Information with Client Cookies
- Supports Server Information with URL Session Identifiers

- ☐ Provides adapter or mechanism to communicate and transfer data at the functional level with Oracle Financials via API's
- ☐ Supports Oracle's API sets for external integration
- ☐ Supports Data Access Adapter capabilities

- ☐ Provides adapter or mechanism to communicate and transfer data at the functional level with Siebel via API's
- ☐ Supports Siebel's API sets for external integration
- ☐ Supports Data Access Adapter capabilities

- Provides adapter or mechanism to transfer transactional information to a fulfillment house, payment processing center, enterprise resource planning system or other third party
- Provides reporting and logging functions to detect communication errors

- ☐ Provides adapter or mechanism to communicate with external systems that provide additional content such as catalog information
- ☐ Provides reporting and logging functions to detect communication error

Client1 NetDynamics

- ① Any Web browser requests a dynamic page
- ② The Web server notifies ColdFusion
- ③ ColdFusion processes the dynamic page based on the CFML tags
- ④ ColdFusion generates an HTML page
- ⑤ The Web server sends the HTML page to the browser
